

Economic Data Analysis Entrance requirements

We suppose that applicants for the program Economic Data Analysis (EDA) are familiar with the following topics (at the bachelor level):

- Basic concepts of matrix algebra (vectors, matrices, matrix operations)
- Basic concepts of integral calculus and derivatives
- Basic concepts of probability theory, random variables, sampling distributions and inferential statistics
- Basic knowledge of MS Excel
- Basic knowledge of freeware R (data management, packages, matrix algebra, data visualization, descriptive statistics)
- Regression analysis with cross-sectional and time series data

Students, who will be admitted to the program, will receive more detailed information, with links on self-study materials.
